Projects

Tata-Aig

- All the screens I had made are all responsive.
- I had added lot of functionality as well as I have integrated API.
- I had optimized existing code in the project.
- I made all screen UI with responsiveness and single-handedly

Technologies used: HTML,CSS,Bootstrap-4,Angular 8,Git ,jira

Nebula

- I had optimized existing code in the project.
- I did functionality of searching, sorting & pagination in a grid table.
- I integrated the API into this project, and I completed the UI single-handedly

Technologies used: HTML,CSS,Bootstrap,Angular 8,Git ,jira

Employee Onboarding

- It is basically an onboarding project which is used by HR.
- I had made functionality to add/modify the employee details.
- I implemented file uploading module using angular material.
- I have added timeline feature to view the status of the employee.

Technologies used: HTML,CSS,Bootstrap,Angular 8,Git
