CAREER OBJECTIVE

Software developer with 3.5 years of total experience in Java and almost 2 years of experience building applications based on angular and spring boot. Looking to leverage my knowledge and experience into a role as Software Developer.

EXPERIENCE

SOFTWARE DEVELOPER

TCS / July 2019 - Present

- Working on development of Angular and Spring boot application (deployed on Azure cloud) used to perform audit of the projects in an organization.
- Working on revamping of Struts based application to angular based application.
- Also working as security spoc in the team and solved various critical security issues present in the application.
- Also worked on Struts framework for short span of time.
- Working on troubleshooting and permanent fixes of production bugs.
- Working in an agile team.
- Worked on manual security testing of application using burp suite and Recx security analyzer tool.
- Working on development of rest API's.
- Working on JBoss server.

TECHNICAL SKILLS

- JAVA and Basics of JAVA 8
- Basic SQL (MySQL)
- Angular 4+ (working on Angular 8 version)
- Spring Boot
- Burp Suite
- MS Office Suite
- Git
- Jenkins

CERTIFICATIONS

- TCS certified – Software Security Assurance Certificate
- TCS certified – Agile Way of Working Certificate

ACHIEVEMENTS

- Received appreciation from senior management in resolving critical security issues present in the application.
- Achieved 7th rank in DAVV university during graduation.
